## COMMODORE'S MESSAGE

Members,

It is an honor and a privilege to serve as Commodore of MBYCA for 2016. It was three years ago when I was approached to join an organization that I had never heard of. Thinking back, I remember asking myself, "Can I commit to this?" After much deliberation, I agreed to join MBYCA as Rear Commodore.

For me it has been an experience of a lifetime. The dedication and commitment of the Officers and Directors of this organization is outstanding. MBYCA represents seventy-six clubs, interfacing with the USCG, USCGA, Port Operators Group, National Boating Federation, DCR, State and Federal Legislation and Boating Safety.

Currently, the recreational boating community faces issues pertaining to: Access to Boston Harbor Islands, legislation impacting boaters, certification of operators, leases for yacht clubs on DCR property, as well as overall costs associated with boating.

In response to these issues, MBYCA acts as the conduit for information pertaining to these key issues and endeavors to adopt new ways to improve communications between MBYCA and the supporting Yacht Clubs. Though monthly meetings continue to be the primary vehicle used to disseminate information, we have also improved our web page and added Facebook to our forms of communication, looking to make it easier for the recreational boater to have important data readily available.

We recognize that boating is an enjoyable pastime and in some cases an adventure. We, at MBYCA, will continue to here, representing all of you.

In closing I want to thank all of the members and their associated yacht clubs for their continued support of a great organization. Finally, I want to thank Mary Jane, the one person who without her support over the last three years would not have made this experience possible.

Sincerely,

Peder B. Acres  
Commodore, MBYCA

“Pet Parade”

# INVITATION

## **Thunderbird Class 58<sup>th</sup> Anniversary 2016 Massachusetts Bay Thunderbird Fleet #5**

*If you love the tranquility of the sunset beyond the horizon,  
the orange-purple sky reflecting in the deep blue colors of the sea;  
if you love the salty spray and wind in your face and the  
feeling of youth no matter your age; if you love the rushing  
water's song under your keel, the calling sounds of seagulls and  
the moonlit bay on a balmy summer night – you are one of us.  
Welcome to the sea, skipper!*

*If you love the excitement at the docks, the rounding of a buoy,  
the beating to the wind and the run with the spinnaker;  
if you love the races, fierce competition, the regattas and the limelight  
of victory, the trophies you cherish, the fellow you beat;  
if you love the speed of your boat, the gunwale awash, the pressure  
on your tiller and the sky above – you are one of us.  
Welcome to the sea, skipper!*

*We invite you to join us to admire the sunset on our cruises,  
to take home the trophies on our races. The Massachusetts Bay Thunderbird  
Association, Fleet 5, invites, welcomes all, who love the sea to join us.*

*You too, skipper.*

## In Memoriam

The following members of the Beachmont Yacht Club  
will be missed by all:

Stanley Wright (2014)  
 Christopher McIntosh (2015)  
 James Stewart (2015)

*We think of you in silence, we often speak your name  
 What would we give to hear your voice and see your face again  
 They say it's a beautiful journey from the old world to the new  
 Someday we'll make that journey which will lead us straight to you  
 And when we reach that garden in which there is no pain  
 We'll put our arms around you and never part again*

*Serving the New England maritime community since 1827.*

Operating in the ports of Boston, Portsmouth, NH, and Portland, ME.

Coming Alongside the Maritime Community  
with Friendship, Faith, and Hospitality

Our economy depends on ships to bring over 95% of all goods we enjoy daily to our shores. Seafarers from all over the world operate these ships while often working in dangerous, lonely, and stress-filled jobs. These seafarers spend four to eight months away from the families they work to support. Unappreciated and underpaid, these seafarers face difficult days at sea to bring us the goods that we want and need.

Seafarer's Friend visits crews daily, often providing the only faces of humanity seafarers will meet for several months; other than security or company personnel. Seafarers deeply value the relationships of care, compassion, and practical assistance offered by Seafarer's Friend.

As ambassadors of our community, our staff and volunteers visit ships daily to offer these vital services:

- SIM/Phone/Internet to connect with family at home
- Ditty bags filled with donated personal care items
- Hand-knitted scarves and caps
- Warm clothing for those unprepared for New England winters
- Van rides to area stores; a chance to feel normal for a few hours
- Magazines to remain current with world affairs
- Security escorts through terminals to allow time ashore (required by USCG regulations)

Most vital is the support and encouragement, which we provide to seafarers in times of stress, loneliness, or conflict/tension between multi-cultural crew members.

Seafarer's Friend serves the seafarers that serve you!! We are a non-profit organization that relies on contributions from the community and volunteers. Without your help, we could not serve these seafarers who provide us with the clothes on our backs, the new cars at our dealerships, the salt on our roads, as well as energy for our cars and homes.

Help us care for these seafarers by donating on our website or mailing us your contribution to the address below. Thank you!

If you would like more information about Seafarer's Friend, or are interested in volunteering, please:

***Past Commodore: Lenny Russell***

***At Large: Charles O'Connor, Douglas Ryan***

***Voted 2013 Yacht Club of the Year by Mass Bay Sailing Association***

***Home of the Great Chase***

***Home of the Race Hull Regatta***

The Hull Yacht Club, founded in 1880, is located directly on Allerton Harbor in Hull. One of the oldest yacht clubs in America, the club has a rich history of yacht racing and cruising. The current membership has a mix of sail, power and social-only members. Allerton Harbor is well protected from all points of the compass. The varied anchorages of the Boston Harbor islands are just minutes away, while many picturesque North and South Shore harbors are an easy weekend cruise.

## JUBILEE YACHT CLUB

Beverly ★ Massachusetts

***Jubilee Yacht Club***, located on Boston's North Shore in Beverly Massachusetts, has carried on yachting traditions since 1896. A private membership based organization, the Club continues to thrive with over 400 active participants. The Club takes its name from an America's Cup contender of 1893, and continues to encourage and foster yacht racing at the highest levels. The Club sponsors and organizes a wide variety of events, such as the popular Thursday Night Race series which has run continuously every summer for three decades and attracts racing yachts from all over the North Shore. Each race features 15 to 40 racers surging across the starting line, competing for honors and recognition in the midst of historic Salem Sound. Weekend races are also scheduled throughout each summer.

Jubilee also organizes five overnight fleet cruises to other yacht clubs – with sail and powerboats participating – conducts two fishing tournaments, and maintains a busy social calendar throughout the year for its members, including Kentucky Derby Day in the spring and Jimmy Buffett Night in the summer. The Club sponsors events benefiting local charities including Beverly Bootstraps family services and Care Dimensions hospice, and also encourages boating safety and education by partnering with the US Coast

Guard Auxiliary and the US Power Squadrons. Jubilee also promotes the future of sailing by supporting a junior sail program and assisting the Beverly High School sailing team to insure that the sailing and boating spirit remains strong on the North Shore for generations to come.

## The Inn at Crystal Cove

ON BEAUTIFUL BOSTON HARBOR  
**617-846-9217**

**1-877-966-8447** (Out of State Only)

600 Shirley Street • Winthrop, MA 02152

Fax: 617-846-9274 • email: [ccove@tiac.net](mailto:ccove@tiac.net)

Website: [www.inncrystalcove.com](http://www.inncrystalcove.com)

The Inn at Crystal Cove is a comfortable, colonial-style inn located in a residential neighborhood of Winthrop, MA.

The Inn offers rooms with balconies, ocean views, and ten studio apartments with private kitchens, for a total of 35 rooms. In addition, we have two beautifully renovated two-bedroom condominiums with water view decks that sleep up to seven.

### **Across the street from the Winthrop Yacht Club and the Crystal Cove Marina**

Winthrop is a pleasant seaside town conveniently located just ten minutes from Logan International Airport and only a short distance by car or public transportation from downtown Boston. The Inn overlooks Crystal Cove, a part of scenic Boston Harbor, with a beautiful, unobstructed view of the harbor and Boston skyline. Boats from yacht

clubs adjacent to the Inn enhance the New England seaside atmosphere. Enjoy the view from our swimming pool and landscaped yard.

There is also a park with basketball courts located next to the Inn. We offer furnished rooms in a friendly, casual atmosphere, at sensible rates. Complete living facilities are available for our guests' use: a fully-equipped kitchen, lounge area, and well-lit parking lot. Parking, WiFi, and local outgoing calls are free to guests. All rooms have air conditioning, cable televisions, and telephones.

We hope you find these local tide charts useful. Please be aware that all tide charts are really just predictions and assume average weather conditions. Usually, onshore winds or low barometric pressure will produce higher tides than predicted and vice-versa.

While we take a lot of care to make these charts as accurate as possible, the MA Marine Trades Association does not warrant the accuracy, completeness, or fitness for a particular purpose of any tide, sun, and lunar information offered through this service. Under no circumstances shall the MA Marine Trades Association be liable to you or any other person for any indirect, special, incidental, or consequential damages arising from the use of this service.

We hope you find these local tide charts useful. Please be aware that all tide charts are really just predictions and assume average weather conditions. Usually, onshore winds or low barometric pressure will produce higher tides than predicted and vice-versa.

While we take a lot of care to make these charts as accurate as possible, the MA Marine Trades Association does not warrant the accuracy, completeness, or fitness for a particular purpose of any tide, sun, and lunar information offered through this service. Under no circumstances shall the MA Marine Trades Association be liable to you or any other person for any indirect, special, incidental, or consequential damages arising from the use of this service.

## Stay Safe on the Water.

### 1. NAVIGATION RULES (RULES OF THE ROAD)

Boaters call navigation rules – the basic laws governing the steering or sailing of a boat – “The Rules of the Road.” The Rules of the Road define the roles and responsibilities of vessel operators. If all operators obeyed these rules, most accidents could be avoided.

One of the reasons the Rules of the Road exist is to keep boats from colliding with each other and with other objects. Since collisions are the number one type of accident on the water, boaters should remember the following Rules of the Road.

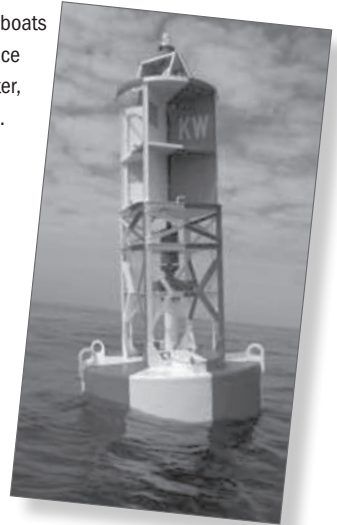

*The Rules vary slightly depending on whether you are boating on inland or on international waters. As an example, when operating on inland waters, sound signals are signals of **intent**; when operating on international waters, they are signals of **action**.*

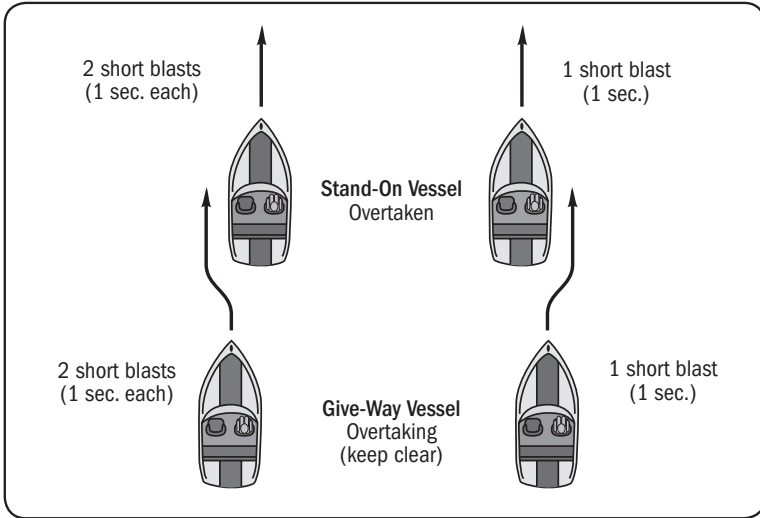

**Post a lookout.** Designate someone to watch for dangers that may come from any direction.

**Maintain a safe speed.** Except where speed is restricted by regulation or the waterway is marked by a “No Wake” or “Slow Speed” Aid, you must judge “safe speed” for yourself, taking into account visibility, vessel traffic, your boat’s ability to maneuver, and the weather conditions.

**Avoid a collision.** The Rules of the Road include the actions to take when encountering another vessel on the water. Some of the most common situations you may encounter are: overtaking, meeting head on, and crossing the bow of another vessel. In each case, the boat designated as the “give-way” vessel is required to yield to the other boat, while the boat designated as the “stand-on” vessel should maintain its course and speed.

### Overtaking Situation (Navigation Rule 13)

**Action(s):** The give-way vessel (bottom) can pass on either side of the stand-on vessel (top).

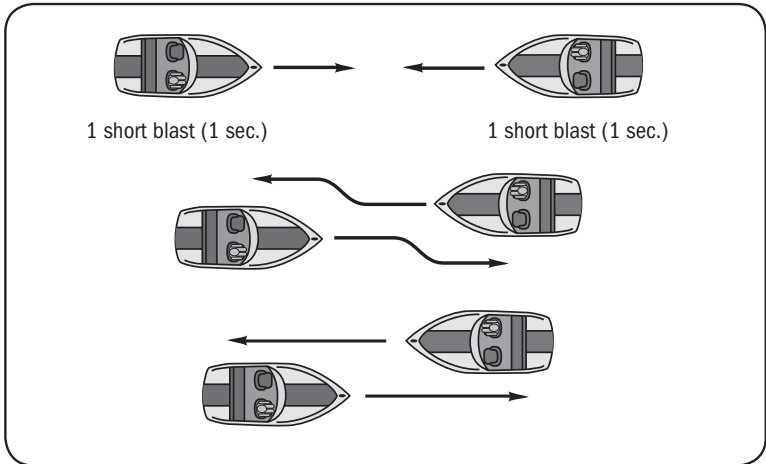

**Sound signals, inland:** Passing portside requires two short (1-second) blasts on the horn signaling the overtaking boat's intention, and two short blasts for the stand-on vessel's agreement. Passing to starboard requires one short blast for intent and agreement.

**Sound signals, international:** Passing portside requires two prolonged (4-6 seconds) and two short blasts for the overtaking boat's intention, two short blasts for the stand-on vessel's agreement. Passing to starboard requires two prolonged and one short blast for intention. An agreement signal is only required when operating in a narrow channel or fairway; then the following blast pattern signals your agreement: one prolonged/one short/one prolonged/one short.

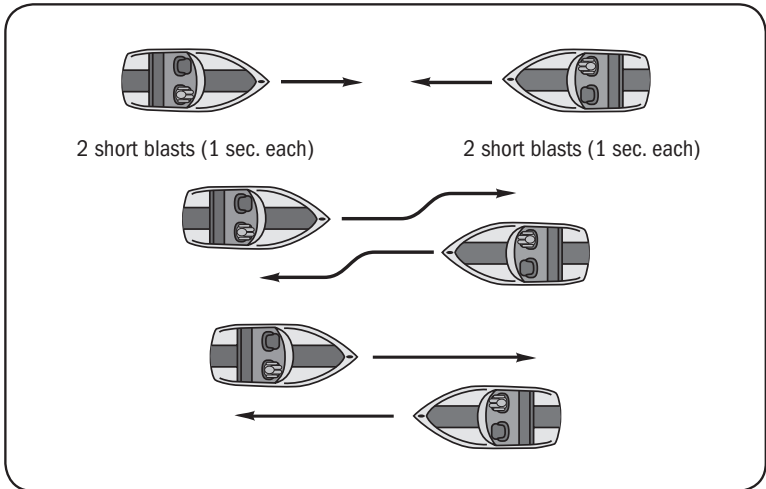

### Head-On Situation (Navigation Rule 14)

Port-to-Port Passing (preferred)

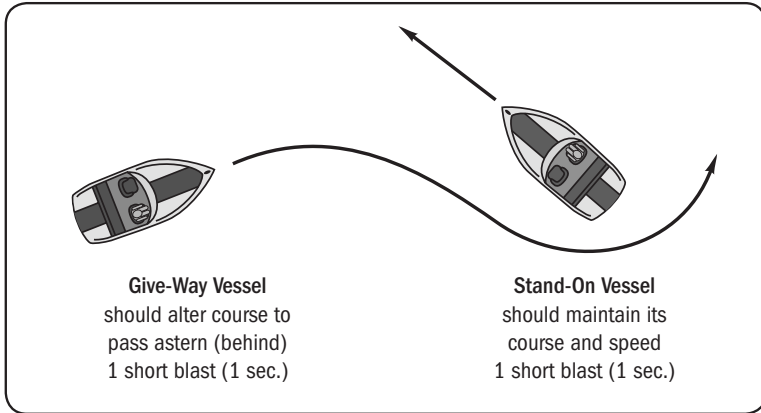

Starboard-to-Starboard Passing

**Action(s):** When meeting another vessel head on, a port-to-port passing is preferred. Passing starboard-to-starboard is acceptable when necessary.

**Sound signals:** Passing port-to-port requires one short horn blast to signal intention and one short blast for agreement. Passing to starboard requires two short blasts from each vessel.

### Crossing Situation (Navigation Rule 15)

*Action(s):* In a crossing situation, the give-way vessel must act to avoid a collision. This may include altering its course to pass astern of the stand-on vessel or slowing down. The stand-on vessel should maintain its course and speed.

*Sound signals, inland:* The give-way vessel signals the stand-on vessel with one short horn blast. The stand-on vessel agrees with one short horn blast.

*Sound signals, international:* The give-way vessel signals the stand-on vessel with one short horn blast. No agreement signal by the stand-on vessel is required.

**When meeting another boat, make early and substantial changes to your course. This helps the other operator understand your intentions.**

There is much more to the Navigation Rules than can be covered here. For more information, go to [www.uscgboating.org](http://www.uscgboating.org) or [www.navcen.uscg.gov](http://www.navcen.uscg.gov).

## 2. THE ESSENTIAL MARKERS: On the Water and On the Charts

The two main types of Aids to Navigation are buoys and beacons.

**Buoys** are Aids that float on top of the water, but are moored to the bottom of the body of water. Some have a light affixed to the top; some do not. A buoy with a cylindrical shape and a conical top is referred to as a "nun." A buoy with a cylindrical shape and a flat top is called a "can."

**Beacons** are Aids that are permanently fixed, most commonly to the bottom of a

body of water. A beacon that has a light attached is simply referred to as a "light"; a beacon without a light attached is called a "daybeacon."

Both buoys and beacons can provide a variety of navigation information via shape, color, light, and/or audible signal.

**Dayboards** are informational signboards. The term **topmark** refers to a non-lighting element, such as a sphere, that may be affixed to the top of an Aid.

RED LIGHTED BUOY

R "2A"

### Understanding the Symbols in This Booklet

Buoys, beacons, and all other Aids have a corresponding symbol used on nautical charts. In this booklet, you will see representations of Aids, each alongside its nautical chart symbol:

\* Not on all Aids

### 3. U.S. AIDS TO NAVIGATION SYSTEM (IALA-B)

#### Lateral Aids to Navigation

Lateral Aids to Navigation are generally used for well-defined channels to indicate the route to be followed. These Aids show the sides of a navigable channel, mark junctions and forks or splits in the channel, indicate the safe side to pass a hazard to navigation, and mark the safe centerline on wide bodies of water.

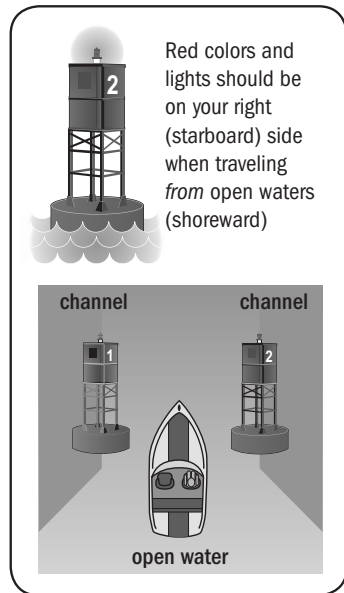

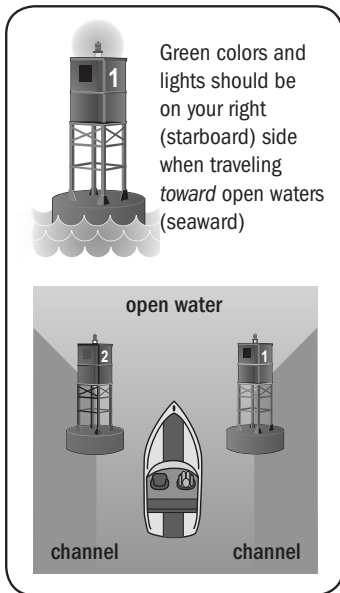

They are used in conjunction with a conventional direction of buoyage (a local direction of buoyage when approaching a harbor, river estuary, or other waterway from seaward).

#### **“Red, Right, Returning”**

You may have heard the phrase, “Red, Right, Returning.” This expression refers to the fact that when returning (entering a channel from the open sea or proceeding upstream), a boater must keep the red Aids on the right (starboard) side of the boat. These Aids have even numbers, and the numbers should increase as you proceed inland.

When proceeding toward open water (seaward), navigate so that the green Aids are to starboard. In this instance, you will see odd numbers on the Aids and the numbers should decrease as you proceed toward open water (seaward).

If there is no route marked, navigate clockwise around landmasses.

## Aids To Navigation

### Waterway Marking Systems <> Channel Buoys

#### LATERAL SYSTEM (FEDERAL)

The waters of the United States are marked for safe navigation by the lateral system of buoyage. This system employs a simple arrangement of colors, shapes, numbers and light characteristics to show the side on which a buoy should be passed when proceeding in a given direction. The characteristics are determined by the position of the buoy with respect to the navigable channels as the channels are entered from seaward.

The expression "red right returning" has long been used by the seafarer as a reminder that the red buoys are passed on the starboard (right) side when proceeding from the open sea into port (upstream). Likewise, green buoys are passed on the port (left) side. Conversely, when proceeding toward the sea or leaving port, red buoys are passed on the port side and green buoys on the starboard side. Red buoys are always even-numbered. Green buoys are odd-numbered. Red and white vertically striped buoys mark the center of the channel.

#### MOORING TO BUOYS

Tying up to or hanging on to any navigation buoy (except a mooring buoy) or beacon is prohibited.

#### AIDS TO NAVIGATION

In recent years, modification to certain aids to navigation located on coastal and inland waters have been completed. These changes apply to aids used in both the lateral and state waterway marking systems. See charts that follow:

- Port-hand buoys are painted green, with green fixed or flashing lights.
- Starboard-hand buoys are painted red, with red fixed or flashing lights.
- Safe water buoys, also called midchannel or fairway buoys, and approach buoys are painted with red and white vertical stripes, with flashing lights.
- Preferred channel, or junction buoys, are painted with red and green horizontal bands, with flashing lights.
- Special marks (traffic separation, anchorage areas, dredging, fish net areas, etc.) are painted yellow. If lighted, the light may be fixed or flashing.

## Uniform State Waterway Marking System

#### Boats Keep Out

Nature of danger may be placed outside the crossed diamond (e.g., waterfalls, swim areas or rapids)

#### Danger!

Nature of danger may be indicated inside the diamond shape (e.g., rocks, reefs, dams, construction or snags)

#### Caution!

Construction Area as indicated in circle (e.g., speed limit, no fishing, no anchoring, ski only, slow - no wake)

#### Information

Tells direction, distances, places, food, repairs, supplies and other non-regulatory messages.

#### Obstruction Marker

Cardinal Buoyage Marker System. Do not pass between shore and buoy.

#### Channel Marker

Lateral System. Keep Buoy on left facing upstream.

#### Mooring Buoy

White with reflectorised blue band. May have white light or reflection.

#### Channel Marker

Lateral System. Keep Buoy on right facing upstream.

#### Boaters Exercise Caution!

The Divers Down Flag means that divers are in the water. A rigid replica of the Alpha Flag means that the vessel is restricted in its ability to maneuver because of underwater operations.

### Information and Regulatory Marks

These orange-and-white Aids are used to alert vessel operators to various warnings and regulations.

<b>Symbol</b>	<b>Meaning</b>	<b>Examples</b>
	<b>Danger</b> A diamond shape alerts boaters to hazards	
	<b>Restricted Operations</b> Marks with a circle indicate areas with regulated operations	
	<b>Exclusion</b> A diamond shape with a cross means boats are prohibited from the area	
	<b>Information</b> Marks with a square provide helpful information such as directions, distances, and locations	

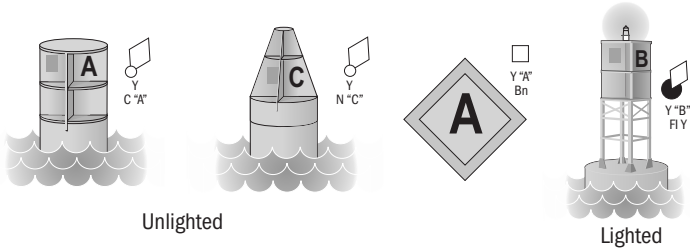

*Characteristics*

- White with an orange horizontal band at both top and bottom.
- Black text within or around an orange square, circle, or diamond; or black text outside a diamond with an orange cross.
- May be buoys or beacons.
- If lit, the light will be white and may have any light rhythm except quick flashing, flashing (2), or Morse code "A."
- The chart symbol for this type of buoy is:

### Special Aids

These Aids indicate special areas or features such as anchoring, traffic separation, fishnet area, cables or pipelines, military exercise areas, and jetties.

Unlighted

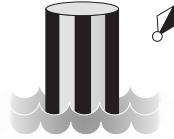

Lighted

#### Characteristics

- All-yellow.
- Come in a variety of shapes.
- May have one black letter.
- If lit:  or 

### State Waters Obstruction Mark

The State Water Obstruction Mark indicates to a vessel operator that an obstruction to navigation extends from the nearest shore to the buoy. Do not pass between the buoy and the shore.

#### Characteristics

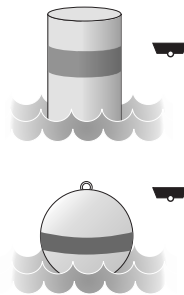

- Black-and-white vertically striped buoy.
- May show a white reflector or display a quick-flashing white light.

### Mooring Buoys

While not a navigational Aid, mooring buoys are worth mentioning. They are the only type of buoys to which mooring is permitted. Most mooring buoys are privately owned or are rental buoys. Permission is usually needed to use them.

#### Characteristics

- White with blue horizontal band.
- Cylinder and sphere shapes.
- May show a white reflector or display white or yellow light.

## 4. BOATING AT NIGHT

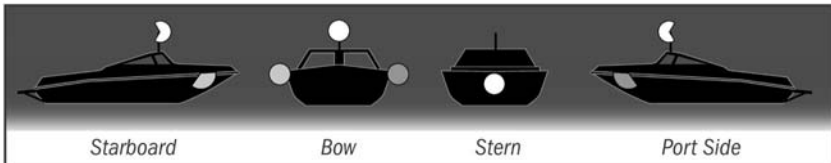

Boating at night can make even familiar waters unrecognizable. Visual depth perception is lessened and lights from the shore can be difficult to distinguish from those on the water. To make nighttime boating safer, keep the following in mind.

### Navigation Lights

Vessels are required to show navigation lights from sunset to sunrise and during periods of restricted visibility. Understanding these light displays will provide invaluable information to the boater, as these lights can help the boater determine the length of another vessel, its orientation in relation to your boat, and the general direction in which it is headed. All operators must ensure that their vessel's navigation lights are working and that the positioning and distance from which they can be seen meet federal regulations.

It is important to know which navigation lights you will see from another boat in certain situations. This can help you determine if you are in an overtaking, meeting, or crossing situation. The following chart illustrates the navigation lights you will see from various angles:

#### INFO

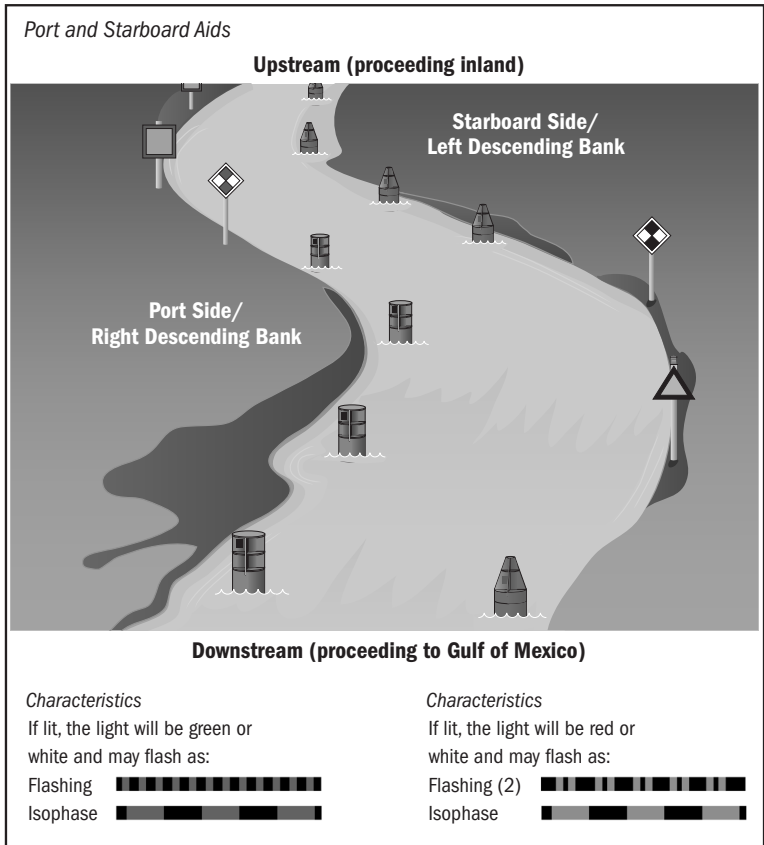

Whenever you see a red navigation light from another vessel, give way. It is the stand-on vessel. According to the Rules of the Road, it has the right of way (see page 2).

If you see both the red and green sidelights of another boat, it is coming straight toward you. You should take action to change course in order to avoid a collision.

## 5. AIDS TO NAVIGATION SYSTEMS

### Western Rivers Marking System

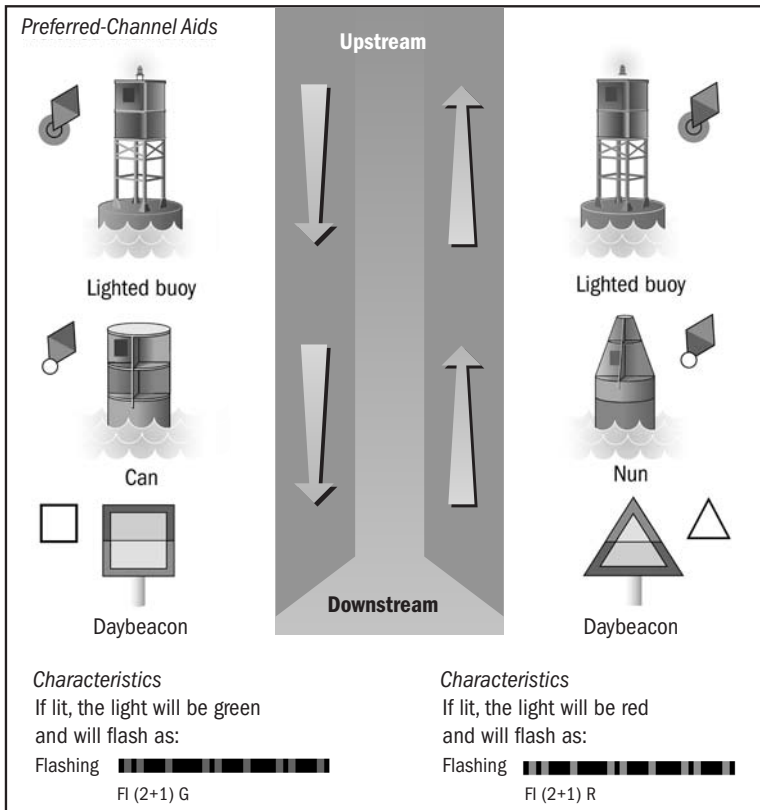

When on the Mississippi River, tributaries above Baton Rouge, and several other rivers that flow toward the Gulf of Mexico, boaters must follow a system called the Western Rivers Marking System, a variation of the U.S. Aids to Navigation System.

In the Western Rivers Marking System:

- Buoys are not numbered.
- Beacons are not numbered, but normally have a mile marker that indicates the distance in statute miles from a fixed point, typically the river's mouth.

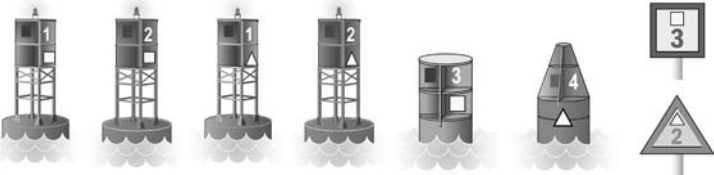

- Crossing daybeacons are used to assist river traffic by indicating where the channel has changed from one side of the river to the other; the aid that marks this channel change will be on the opposite side of the river. When encountered, a vessel operator should head for the Aid, using its color as a channel mark.
- Isolated danger marks and safe-water marks are not used.
- River banks are named based on their downstream direction: either “left bank” and “right bank” or “left descending bank” and “right descending bank.”
- Because of their somewhat temporary nature, Western River buoys do not have numbers or letters and are not always marked on river charts because they tend to drift due to fluctuating water level, current speed, and shifting shoals.

### Intracoastal Waterway

The Intracoastal Waterway (ICW) runs just inland and parallel to the Atlantic and Gulf coasts from Manasquan, New Jersey to the Mexican border. The Aids to Navigation of the ICW closely resemble the green and red buoys and beacons of the lateral system previously discussed.

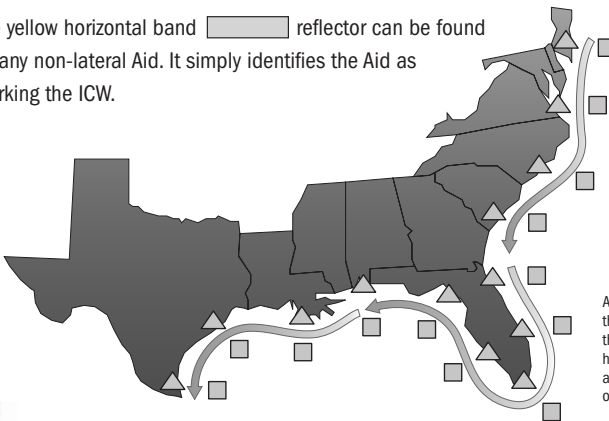

When operating in the ICW, the color of the Aids will typically correspond to the USATONS scheme (Red, Right, Returning). The yellow squares, triangles, and bands attached to the Aids are the primary ICW indicators. Boaters need to understand these markings to safely navigate the ICW. Some examples:

There are three types of symbols:

When following the ICW from New Jersey through Texas, keep yellow triangles  on your starboard and yellow squares  on your port, regardless of the color of the Aid on which they appear.

The yellow horizontal band  reflector can be found on any non-lateral Aid. It simply identifies the Aid as marking the ICW.

Arrows do not indicate the actual location of the ICW. Arrows depict how aids to navigation are oriented when operating in the ICW.

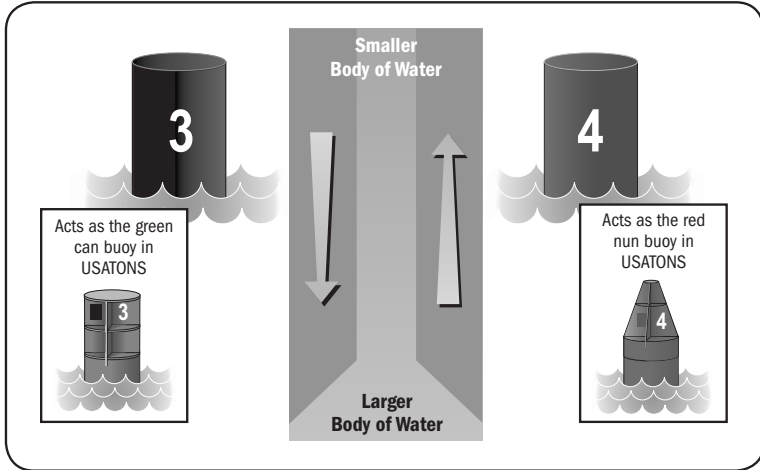

*ICW beacons and buoys do not correspond to IALA-B's color system because ICW and non-ICW routes may travel next to each other in opposing directions – and share the same Aids. Thus, when following the ICW, navigate by the yellow symbols; otherwise, navigate by the color of the Aid itself.*

## Uniform State Waterway Marking System

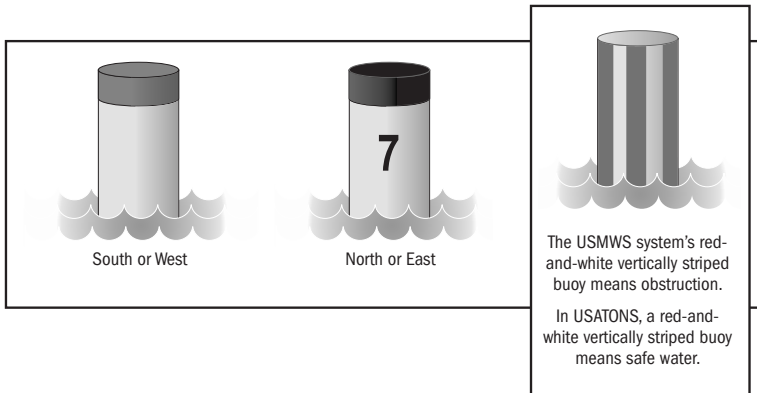

The Uniform State Waterway Marking System (USWMS) was discontinued and replaced by the U.S. Aids to Navigation System (USATONS) in 2003. Should you come across one that has not yet been replaced, a guide is provided below:

### Lateral System - USWMS

### Cardinal System - USWMS

Cardinal buoys serve as the USWMS version of USATONS' preferred-channel markers, as they indicate the primary route. They are named "cardinal" buoys after the cardinal points (north, south, east, and west) of the compass:

## Surprisingly Comfortable

Today's life jackets are lightweight, easy to move in, and come in many sizes, styles, and shapes for every person and every sport. (There are even ones for pets!) Some examples:

### Inflatable

for general recreational boating

### Belt Pack Inflatable

for general recreational boating

### Vest-Type Flotation Aid

for personal watercraft, waterskiing, and water sports

### Child Hybrid Inflatable

for general recreational boating

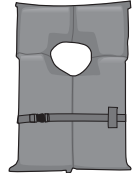

### Child Life Jacket

for general recreational boating

### Flotation Aid

for general recreational boating

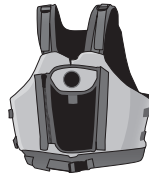

### Vest Type

for general recreational boating

### Inflatable Fishing Vest

for angling and hunting

### Paddling Jacket

for paddlesports

### Offshore Vest

for offshore boating and racing

## Emergency Rescue Procedures

### ACCIDENT REPORTING

Boat Operators involved in an accident must provide their name, address and vessel registration to other involved parties, provide assistance and, in case of death or disappearance report the accident to law enforcement officials.

Boat operators or owners must also make a written report of a boating accident to the Department of Boating and Waterways when:

1. A person dies
2. Personal injury requiring medical treatment beyond first aid
3. Total vessel damage exceeding \$500
4. Complete loss of the vessel
5. Disappearance of a person or person(s) from suspected injury or death.

This report must be made within 48 hours of the accident in cases involving disappearance, a death that occurs within 24 hours of the accident, or injury that requires medical treatment beyond first aid.

If you are unsure about how to report a boating accident, simply call the Coast Guard's toll-free **BOATING SAFETY HOT-LINE at 1-800-368-5647** for information.

### CAPSIZING

If the boat is too large or heavy to right by yourself, do not attempt to swim away; **STAY WITH THE BOAT** and wait to be rescued. **KEEP YOUR LIFE JACKET ON.** If the boat is small and light enough to right, swim around the boat and grab or climb on the windward rail (the side of the boat sticking up in the air) to pull the hull back in the water. If your boat has a centerboard, pull down or stand on it to see-saw the boat upright. If it's a sailboat, uncleat the sheets (lines) that holds the sails in place; if you don't, the sails can fill with air as soon as the boat is righted and tip it over again.

### MAN OVERBOARD

If **YOU** fall overboard, your main concern is to stay afloat. If you are not wearing a life jacket and cannot grab a personal flotation device, try to catch air in your clothing for buoyancy. In cold water, don't expend too much energy; tread water very slowly, or if wearing a life jacket, assume the huddled H.E.L.P. (Heat Escape Lessening Posture) position to conserve body heat. Try to make your head and shoulders as visible as possible so rescuers can spot you.

If **SOMEONE ELSE** falls overboard, immediately steer the vessel toward the side he fell off. Post a lookout. Throw the victim a life ring or other personal flotation device, plus a lifeline with a bowline loop at the end to slip over his body and under his arms. If available, throw out a manoverboard pole, a buoyed, counterweighted pole with a highly visible flag on top to alert other boaters of the victim's presence and to mark the spot for the rescue boat. Stop the forward progress of the boat by taking the engine out of gear, or by luffing the sails on a non-powered sail boat. Alter your course 90 degrees and prepare to come alongside the victim for rescue.

### RESCUING A VICTIM WITH YOUR BOAT

When coming alongside someone in the water to perform a rescue from your boat, if possible, pick the victim up on the windward (upwind) side of the boat (the approach suggested by the American Red Cross and the United States Yacht Racing Union). Put the engine in neutral as soon as you are next to the victim so there is no propeller turning which might cause serious injury. Put a sturdy swimmer's ladder over the side and have at least one crew member put on a life jacket and prepare to help the victim. If the victim is unconscious or unable to climb the ladder or assist in his own rescue (which is especially difficult in rough seas), he may need to be hauled onboard by several crew members, either by a lifeline or by his clothing.

An alternate rescue method suggested by the Coast Guard is to have someone onboard stand on one end of a blanket or net. The opposite end should be placed under and then wrapped over the victim and pulled by the person overboard. By doing so you can roll the victim out of the water and onto the boat.

# Flags and Where to Fly Them on Boats

Flag	When Flown	Motorboat- bow & stern stuffs only	Motorboat- bow & stern stuffs and signal mast	Motorboat- two masts	Sailing Yacht- one mast	Sailing Yacht- two masts	Sailing Yacht- more than two masts

*To all who have passed  
but have never left our hearts...*

### *A Sailor's Prayer*

*The Lord is my pilot, I shall not drift.  
He lighteth me across the dark waters,  
He steereth me into the deep channels,  
He keepeth my log.  
He guideth me by the star of holiness for his name's sake.  
Yea, though I sail 'mid the thunders and the tempest of life,  
I shall dread no danger, for thou art near me.  
Thy love and care, they shelter me.  
Thou preparest the harbor before me in the homeland of eternity.  
Thou annointest the waves with oil.  
My ship rideth calmly.  
Surely sunlight and starlight shall favor me on the voyage I take,  
And I will rest in the port of my God forever.*

*May you all be blessed.  
Your MBYCA Boating Family*
